P-C氣動精密單向閥泵

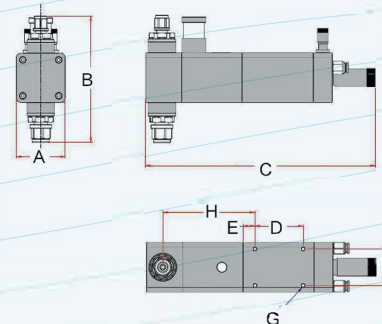

P-C 氣動精密單向閥泵

- P-C系列氣動單向閥型計量泵，採用精密的單向閥設計，適合用於各種不含顆粒的中低年度異體的定量注液。
- 千分尺容量微分頭和整體內置配裝的速度控制器，能精準控制注液量和注液速度，實現在各種條件要求下的計量注液。
- 該系列的計量泵具有極高的計量精度與重覆一致性；精度優於正負千分之五。
- 標準泵型全316不鏽鋼結構，泵的所有零件都有更好的耐腐蝕性。在實際鋰離子電子注液和其他工業應用中，耐腐蝕性能優於進口計量泵。
- P-4系列配備特別設計的電器聯控系統，配合氣動傳感器，注意完成自動回程。專利設計的內置速度控制單元，整機更緊湊。可靠的氣控閥，沒有氣閥洩漏的煩惱。

應用：電解液、電子煙油、熱管超純水、香水、洗髮水化學液體、藥液、溶劑、精油、精華液等。

P1-C / P2-C 系列

UBA Pneumatic Check Valve Pump

The UBA Check Valve Style Dispensing Pumps are designed for dispensing low to medium viscosity liquid not containing particles.

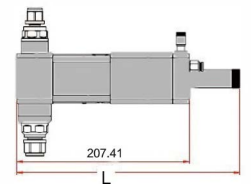

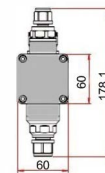

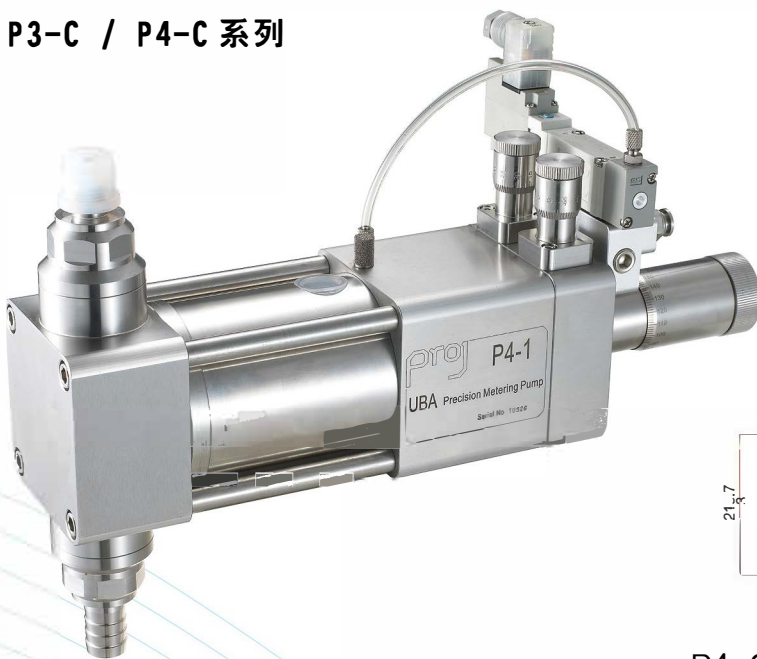

Precise micrometers volume adjustment and built-in speed control system ensures dispensing accuracy and plunger motion speed control, by which the pumps are suitable for different working condition. Typical accuracy is within ± 0.5 .

Complete 316 stainless steel pump construction. All pump parts have better rot-proof performance compare with imported pumps, especially on Li-Ion electrolyte application.

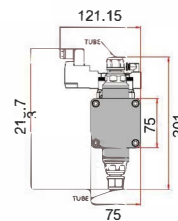

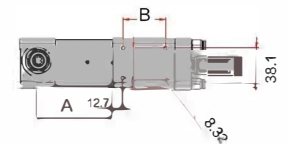

P4-C series pumps have special pneumatic-electric control unit with forward position sensor. The plunger may return automatically after complete dispensing stroke. Patent build-in speed control unit makes the pump more compact. Reliable pneumatic-electric valve ensures no leakage operation.

Application: Electrolyte, E-Cigarette Oil, Hot Pipe Water, Perfume, Pan Ink, Shampoo, Chemical Liquid, Medicine, Solvent, Essential oil and more.....
